Behind the Headline

By Leo Nyberg

When bureaucrats in Washington want to change a rule, they must solicit feedback from the public. When Immigration and Customs Enforcement suggested a $70,000 fee for the period that international students spend between graduation and employment, too many Yalies to count answered their call for feedback.

Students — both U.S. citizens and internationals — urged ICE to withdraw the fee, citing that the presence of international students in the classroom and research labs enriched their Yale experience. In interviews from Beinecke Plaza to a coffee shop near the Yale School of Medicine, international students told me about the stress the rule has created. While it remains unclear what will happen to the fee, Yalies from the University's top lawyer to undergraduate international students put their comments on record, and the government is required by law to read them.
